

Joel Nyongesa - Personal Resume Website

Student: Joel Nyongesa

Project title: Data Science Resume Website using HTML, CSS, JavaScript, and Bootstrap

Summary of Customization

I customized a BootstrapMade resume/CV template direction into a complete data science portfolio using Joel's portrait, CV content, education, experience, skills, awards, Hugging Face computer-vision deployments, climate dynamics work, and database systems projects.

Latest Project Updates Added

1. TrafficSense Studio: YOLO11 and ByteTrack traffic video counting/tracking app deployed on Hugging Face.
2. Scene Image Classifier: PyTorch and TensorFlow CNN app for Intel scene classes, deployed on Hugging Face.
3. Group Three ITCZ climate dynamics project personalized as Joel's AIMS Senegal climate presentation work.
4. Secure IoT-Based Agricultural Monitoring System with PostgreSQL ER design, zero-trust architecture, Dash dashboard, and MongoDB.
5. Updated project filters, metrics, links, and project descriptions for accuracy and precision.

Technology Used

HTML5, CSS3, JavaScript, Bootstrap 5, Bootstrap Icons, AOS, GitHub Pages, and linked Hugging Face Spaces.
