

Personal Resume Website Report

Full name	Joel Nyongesa
Project title	Data Science Resume Website using BootstrapMade MyResume
Template used	BootstrapMade MyResume - https://bootstrapmade.com/free-html-bootstrap-template-my-resume/
GitHub repository	https://github.com/Joe254h/python
Deployed URL	https://joe254h.github.io/python/

Summary of customization

I customized the BootstrapMade MyResume template into a creative data-science portfolio. The site now uses my portrait, CV content, and data-science sections for profile, education, technical skills, professional experience, project experience, focus areas, contact information, and downloadable CV. I added custom styling, data-themed project visuals, responsive layout fixes, Bootstrap icons, portfolio filters, typed text, and GitHub Pages deployment.

Submission files

The project folder contains HTML, CSS, JavaScript, Bootstrap vendor files, images, the downloadable CV PDF, generated portfolio visuals, this report PDF, and the BootstrapMade template attribution.
